NATURE MAKING IT GREAT

OKLAHOMA'S MATERIAL PROSPERITY IN RIPENING CROPS BEST EVER KNOWN.

Guthrie, Okla., June 29.—The wonderful richness and productivity of Oklahoma! Land of the rhapsodist; region of perennial flower and fruit. In no other year since the country was opened to settlement and the plowshare sunk in the soil has there been promise of such bountiful yield of crops.

From border to border of the state the answer to inquiries about crop conditions is the same—the best ever known. And there has been no damage by insect pests that have caused losses in other years. Last May a period of dry weather made wheat growers despondent, and there was prediction of a short crop. This temporary lack of rainfall left the corn and cotton fields open to the plow, with the result that these latter crops were placed in ideal cultivation. Then seasonable rains began falling, and have continued to the present hour.

Wheat has been harvested and is being threshed. Farmers that estimated a yield of only ten or twelve bushels to the acre are getting from fifteen to eighteen bushels, and those in more favored localities that counted upon eighteen and twenty bushels are putting from twenty to twenty-five bushels into their granaries. The increase over early estimates has been from 15 to 25 per cent. Best of all, the quality of grain is superior to that of any other year, grading from fifty-nine to sixty-two pounds to the bushel. In Garfield and other counties in the wheat belt sixty-three and one-half pound wheat has been reported. Many farmers have contracted their wheat at more than a dollar a bushel, and few of them expect the price to fall below a dollar. This price should make the farmers' income from his wheat greater than it was in years when the acre yield was larger. The state department of agriculture places the wheat acreage at 2 million.

Oats have shown the same remarkable growth and development as wheat, and the yield will be comparatively as good. The oats acreage is fixed at 800,000.

Oklahoma's master crop this year, however, will be corn. The increase increase over last year is placed at 25 per cent and 5 million acres are planted to corn. The season has brought every condition favorable to the maximum growth of this crop. The fields are free of weeds, the stalks are strong and vigorous, the color has the black green of a ripe Triumph watermelon, and the soil is filled with an abundance of moisture. Fine rains have fallen throughout the state in the last few days. The growing weather could not be better, the air humid. This condition is not less true in Central and Eastern Oklahoma than in the counties bordering on the Texas Panhandle, from Mangum to Woodward. A correspondent of the state department of agriculture, writing from Caddo county, declared that it probably would be necessary to "annex" a big part of Texas to crib the corn of Southwestern Oklahoma.

Corn growers expect to get from forty to fifty cents a bushel; some of them have contracted their corn at fifty cents a bushel. Only a few weeks more of seasonable weather will be required to place the corn beyond possible danger, and the outlook for this is extremely favorable.

The 2,311,000 acres of cotton in Oklahoma is later than usual because of cold, inclement weather at time of planting, and is open to menace of early frosts, which would reduce the yield. Like other crops, however, cotton may be smiled upon until brought to a maximum yield.

Oklahoma's material prosperity has been phenomenal, and the wonder of residents of other states. The development of natural resources has been constant. The towns have flourished to an astonishing degree.

Men Past Fifty in Danger.

Men past middle life have found comfort and relief in Foley's Kidney Remedy, especially for enlarged prostate gland, which is very common among elderly men. L. E. Morris, Dexter, Ky., writes: "Up to a year ago my father suffered from kidney and bladder trouble and several physicians pronounced it enlargement of the prostate gland and advised an operation. On account of his age we were afraid he could not stand it and I recommended Foley's Kidney Remedy, and the first bottle relieved him, and after taking the second bottle he was no longer troubled with this complaint." WANT A DECORATOR.

Woodmen Lodge Wants Some One to Decorate Carriage for Them.

The members of the Modern Woodmen lodge have decided to have a decorated carriage in the big parade on next Monday, but are somewhat up against it for a decorator to help them out. Clerk Haynie has not the time to devote to the work, and the lodge hopes to carry off the prize for the best decorated carriage. Some feminine hand is believed could help the Woodmen out, and incidentally earn a few dollars by volunteering to decorate their carriage. The lodge will furnish all the material together with the carriage, and what they want is some one who is able to do the decorating after their own designs. Anyone who feels so disposed may find it to their interest.

HUMORS IN THE BLOOD

When the blood is pure and healthy the skin will be soft, smooth and free from all eruptions or disease, but when the circulation becomes infected with any unhealthy humor the effect is shown by eruptions, pimples, boils, or some more definitely marked skin disorder, such as Eczema, Acne, Tetter, Psoriasis, Salt Rheum, etc.

Humors get into the blood, usually because of an inactive or sluggish condition of those members whose duty it is to collect and carry off the waste matter and refuse of the system. This unhealthy matter is left to sour and ferment and be absorbed into the blood, and soon the circulation becomes filled with an acrid, irritating humor.

The blood then, instead of performing its natural duty of nourishing the skin, regulating its temperature and preserving its uniform softness, pliability and healthfulness, irritates and diseases the delicate tissues and fibers around the pores and glands and produces some of the various forms of skin eruption or disease.

The cause of all skin affections can be traced to some kind of humor in the blood. Healthy cuticles are only possible where the circulation is pure; and
